CAReer – The Top Talent Program is the ideal start for a long-term career with Daimler. Being an entry-level professional training program, CAReer is targeted at university graduates or early professionals who want to get to know the company inside out and take on management and project responsibility early on. With this particular CAReer position, you will launch your future career in the department “Vehicle services & Infotainment”.

The innovations of tomorrow require ideas today. We create the next generation of User Interaction which will set new standards in usability, accessibility and safety for years to come. Design whole product user experiences together with internal and external partners. Implement preparatory simulation processes. The department VAN/ESD (Telematics and Vehicle Services) designs future Telematics services and user interfaces for all Mercedes-Benz Vans model lines.

Your responsibilities include
- Designing, coordinating and validating user interaction (UI) concepts for instrument clusters and head units.
- Creation of UI specifications of UI concepts in close collaboration and coordination with relevant partners (MB passenger cars, Design, advanced engineering, those responsible for components).
- Validation of concepts via simulation and prototyping.

We expect from you
- An excellent university degree in Communications technology, Product design, Computer science, Media informatics, or equivalent (ideally as a Master degree)
- First professional work experience (18 months are obligatory with a Bachelor’s degree)
- Several months of solid experience abroad
- Excellent English language skills along with very good knowledge of German
- You convince us with your personality and enjoy the management responsibility
