COMPANY DESCRIPTION
SAP started in 1972 as a team of five colleagues with a desire to do something new. Together, they changed enterprise software and reinvented how business was done. Today, as a market leader in enterprise application software, we remain true to our roots. That’s why we engineer solutions to fuel innovation, foster equality and spread opportunity for our employees and customers across borders and cultures.
SAP values the entrepreneurial spirit, fostering creativity and building lasting relationships with our employees. We know that a diverse and inclusive workforce keeps us competitive and provides opportunities for all. We believe that together we can transform industries, grow economies, lift up societies and sustain our environment. Because it’s the best-run businesses that make the world run better and improve people’s lives.

Job description :
Requisition ID: 239972
Work Area: Software-Design and Development
Location: Walldorf
Expected Travel: 0 - 10%
Career Status: Graduate
Employment Type: Regular Full Time

About the team ABAP Platform
SAP ABAP Platform drives innovation from the heart of SAP. ABAP Platform consists of more than 600 people located around the globe. We are SAP’s technical foundation and proud that our innovations are used by over 12 million people in 120 countries.
Since decades, the ABAP Application Server has been the foundation of SAP’s on-premise business solutions. In the new SAP Cloud Platform ABAP Environment, the ABAP Application Server is offered as Platform-as-a-Service (PaaS) for cloud applications.
Our cloud customers and partners expect highly available system landscapes and software updates with near-zero downtime and guaranteed stability. Highest software quality and fast delivery cycles for new features are a prerequisite. To ensure this, we will transform our software testing infrastructure, our development and delivery processes, to fully embrace the practices of Continuous Integration and Continuous Delivery (CI/CD).

The Role
We’re looking for motivated and talented (junior) developers (f/m/d) who want to embark on an exciting journey with us to create innovative, high quality core technology components with care and attention to detail.
Developing software at SAP is more than just writing efficient code in ABAP, C++, or Java - it’s a team effort: starting at product definition and design, including coding, testing, quality assurance, and documenting the results. We follow agile software engineering methods and are always in close contact with our customers and stakeholders to acquire early feedback. We consume and contribute to Open Source.

Role Requirements
Above all you should have an open mind. We expect you want to learn a lot of new and cool stuff - new technologies, methodologies, and ways to think out-of-the-box.
During your first 12 months, we offer training courses geared to your individual knowledge and experience, a buddy program, and regular knowledge exchanges with other rookies and seasoned colleagues. Importantly, we don’t just expect you to learn from us – we want you to share your fresh insights and ideas actively with us as well.

You have

- a degree in computer science, mathematics, natural science, engineering or like
- the ability to understand complex technical concepts and solve problems
- a good understanding of Continuous Integration and Continuous Delivery
- the attitude of a team player
- fluency in German and English

Interested? Then don’t hesitate to apply and become a valuable member of the ABAP Platform unit. Alternatively, feel free to contact us at thecore@sap.com.

**Work Experience**
The position is suited for developers starting their professional career.

**WHAT YOU GET FROM US**
Success is what you make it. At SAP, we help you make it your own. A career at SAP can open many doors for you. If you’re searching for a company that’s dedicated to your ideas and individual growth, recognizes you for your unique contributions, fills you with a strong sense of purpose, and provides a fun, flexible and inclusive work environment – apply now.

**SAP’S DIVERSITY COMMITMENT**
To harness the power of innovation, SAP invests in the development of its diverse employees. We aspire to leverage the qualities and appreciate the unique competencies that each person brings to the company. SAP is committed to the principles of Equal Employment Opportunity and to providing reasonable accommodations to applicants with physical and/or mental disabilities. If you are in need of accommodation or special assistance to navigate our website or to complete your application, please send an e-mail with your request to Recruiting Operations Team (Americas: Careers@sap.com).

Successful candidates might be required to undergo a background verification with an external vendor.
