COMPANY DESCRIPTION
SAP started in 1972 as a team of five colleagues with a desire to do something new. Together, they changed enterprise software and reinvented how business was done. Today, as a market leader in enterprise application software, we remain true to our roots. That’s why we engineer solutions to fuel innovation, foster equality and spread opportunity for our employees and customers across borders and cultures.
SAP values the entrepreneurial spirit, fostering creativity and building lasting relationships with our employees. We know that a diverse and inclusive workforce keeps us competitive and provides opportunities for all. We believe that together we can transform industries, grow economies, lift up societies and sustain our environment. Because it’s the best-run businesses that make the world run better and improve people’s lives.

About SAP Transportation Management

SAP Transportation Management (SAP TM) development team strives to use the latest technologies to enhance transportation efficiency. SAP TM supports all activities connected with the physical transportation of goods from one location to another using suitable transportation modes (road, rail, sea or air). One can create and monitor highly sophisticated transportation plans fulfilling the relevant constraints (e.g. service level, costs, and resource availability), determine options to save costs and to optimize the use of available resources, react to transportation events (like traffic jams, accidents etc.) and find solutions to overcome unforeseen deviations from the original transportation plans.

Right from the beginning, SAP TM uniquely supported integrated and connected supply chain execution processes for shippers, freight-forwarders and carriers with a best-in-class solution. We are part of SAP S/4HANA On Premise and Cloud Edition.

SAP TM development teams are located in Germany (Walldorf and St. Ingbert), and India (Bangalore) and work in an agile software development process following the Scrum methodology. All teams are working in close collaboration with customers and implementation partners.

Now it’s up to you: Join our team and get in the driver’s seat of quality assurance and scrum master for the digital supply chain.

WHAT YOU GET FROM US
Success is what you make it. At SAP, we help you make it your own.
A career at SAP can open many doors for you. If you’re searching for a company that’s dedicated to your
ideas and individual growth, recognizes you for your unique contributions, fills you with a strong sense of purpose, and provides a fun, flexible and inclusive work environment – apply now.

**SAP'S DIVERSITY COMMITMENT**

To harness the power of innovation, SAP invests in the development of its diverse employees. We aspire to leverage the qualities and appreciate the unique competencies that each person brings to the company.

SAP is committed to the principles of Equal Employment Opportunity and to providing reasonable accommodations to applicants with physical and/or mental disabilities. If you are in need of accommodation or special assistance to navigate our website or to complete your application, please send an e-mail with your request to Recruiting Operations Team (Americas: Careers@sap.com).

Successful candidates might be required to undergo a background verification with an external vendor.

**Required profile:**

**The Role**

We are looking for a Quality Associate/Specialist (f/m/d) to strengthen our team. Ideally the candidate should also be interested in being a scrum master for one of our development teams.

As a Quality Associate/Specialist (f/m/d) you will:

* Analyze, define, implement and execute quality and test related activities according to a given quality- and test-strategy for the product area
* Create a detailed test design incl. test system landscape requirements and product standards, prepare tests (customizing & master data), author and execute manual and automated tests
* Analyze test results (issues) and take appropriate follow-up actions
* Be the subject matter expert in the team in terms of quality assurance and test related processes, methods and tools
* Drive forward test automation, tools and concepts
* Work closely together with other project teams worldwide
* Use actively lean/agile practices, methods and tools in his/her working environment
* Take over the role of Scrum Master in addition to the role of Quality Associate/Specialist would be a plus: organizing the Scrum team and is responsible that lean/agile methodologies are understood and put into practice properly in context of lean/agile projects together with Product Team

**Role Requirements**

* University Degree in science or engineering
* Basic product domain knowledge incl. relevant business processes & scenarios and a basic understanding of customer needs
* Basic knowledge about relevant product and process standards, important legal requirements as well as quality assurance and test related tools (test automation in the cloud environment)
* Experience and interest in test automation (especially in the cloud environment) is a plus
* Good performer, ability to deliver on time and ensure quality
* Knowhow in logistics, especially transportation management processes is beneficial
* Experience in test automation (especially in the cloud environment) is a plus
* Experience with lean/agile practices, methods and tools is a plus
* Strong verbal and written communication skills with fluent German and English

**Work Experience**

The job addresses early talents with a limited amount of prior work experience. Of course, some background in transportation logistics, agile development and/or quality management would be helpful.
