Company description :
COMPANY DESCRIPTION

SAP started in 1972 as a team of five colleagues with a desire to do something new. Together, they changed enterprise software and reinvented how business was done. Today, as a market leader in enterprise application software, we remain true to our roots. That’s why we engineer solutions to fuel innovation, foster equality and spread opportunity for our employees and customers across borders and cultures.

SAP values the entrepreneurial spirit, fostering creativity and building lasting relationships with our employees. We know that a diverse and inclusive workforce keeps us competitive and provides opportunities for all. We believe that together we can transform industries, grow economics, lift up societies and sustain our environment. Because it’s the best-run businesses that make the world run better and improve people’s lives.

Requisition ID: 240620
Work Area: Software-Design and Development
Location: Walldorf
Expected Travel: 0 - 10%
Career Status: Professional
Employment Type: Regular Full Time

About the team

The SAP S/4HANA Source to Pay & Order to Cash unit drives innovation and thought leadership across the source to pay and order to cash processes. This benefits buyers and suppliers by enabling companies to sell physical, digital, and subscription-based goods as a service and by monetizing subscriptions and real-time usage-based services. SAP S/4HANA is the single source of information for customers on their digital journey: planning, execution and analysis, prediction to simulation, all in real-time within one system, integrated with SAP C/4HANA, SAP Ariba, and Fieldglass.

The Order to Cash (O2C) Billing & Pricing area (part of the S/4HANA Source to Pay & Order to Cash unit) covers the entire end-to-end process from an accepted offer to cash. We are dedicated to enabling customers to drive innovative pricing models, such as pay-per-use, and the subscription business for any kind of services such as digital products and usage-based products. O2C supports multisided partner-centric businesses involving revenue sharing in a fully intelligent and automated manner. It is the goal of the O2C Billing & Pricing unit to maintain and extend a strong relevance for our customer base while transforming our offering along our Intelligent Enterprise roadmap to the cloud.

In this context, SAP Subscription Billing is being developed as a cloud-native application in a true DevOps manner. Our applications are highly consumable, built on a flexible microservice-based architecture, and deployed to the public cloud.

We are looking for a strong, self-motivated, passionate person to join our development team as an
(Associate) Developer.

The Role

As a developer (associate) you will be part of a Scrum team that is responsible for implementing features and functions according to the defined backlog in a DevOps environment.

You will be working on microservices that are typically developed in Java and JavaScript and interact with each other via messaging and API calls. The frontend is typically developed with SAP UI5 and based on JavaScript.

In this context, you will be responsible for ensuring consistently high quality with a high degree of test automation – after all you, as a developer in a DevOps team, are responsible for issues that come up in any deployments.

What do we expect from you?

In the first place? An open mind! We build software that redefines the interaction of corporations – small and large – with their customers. We expect you to want to learn a lot of new and cool stuff. New technologies, methodologies and ways to think out-of-the-box. Of course, we won’t leave you alone with this task. Our promise to you is that we will facilitate and support your learning with seasoned colleagues and mentors. Oh, yes, one more thing: We don’t only expect you to learn from us – we want YOU to share your fresh insights and ideas with us as well.

WHAT YOU GET FROM US

Success is what you make it. At SAP, we help you make it your own.

A career at SAP can open many doors for you. If you’re searching for a company that’s dedicated to your ideas and individual growth, recognizes you for your unique contributions, fills you with a strong sense of purpose, and provides a fun, flexible and inclusive work environment – apply now.

SAP’S DIVERSITY COMMITMENT

To harness the power of innovation, SAP invests in the development of its diverse employees. We aspire to leverage the qualities and appreciate the unique competencies that each person brings to the company.

SAP is committed to the principles of Equal Employment Opportunity and to providing reasonable accommodations to applicants with physical and/or mental disabilities. If you are in need of accommodation or special assistance to navigate our website or to complete your application, please send an e-mail with your request to Recruiting Operations Team (Americas: Careers@sap.com).

Successful candidates might be required to undergo a background verification with an external vendor.

Required profile :
Role Requirements

Required skills

* University degree in Computer Sciences, Business Informatics or a related subject
* Programming skills in Java/Spring Boot and/or JavaScript
* Agile Development Practices
* Experience in test automation
* Keen to learn new skills and techniques around cloud software development and deployment, and apply these learned assets in our project
* Fluent in English and in German
* It is a bonus, if you already have experience with SAP Cloud Platform (Cloud Foundry) or knowledge of developing with SAP UI5 / Fiori

Work Experience

Are you a developer (associate) looking for a new challenge in a dynamic project? We’re happy to receive your application and to hear your insights into the future of the cloud. Of course, that doesn’t mean you shouldn’t apply if you don’t have many years of work experience. We’d definitely like to hear from you, in any case!
